PROGAUGE

STEPPING DRIVE TACHO METER ø60

Sequential Shift Lamp

A smooth shift change can be realized due to the F-1 type sequential lamp system that gives you warning lights as you approach the set rpm.

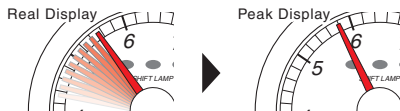

1,000 rpm before; 1st lamp will go on (green)

Shift Point; 2 lamps blink (red)

Peak Hold Function

Show the peak reading after the engine begins running.

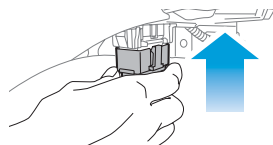

Compatible with Wide Range

Direct Auto-Detection of RPM signal makes it possible to install in wide variety of 12V models (including some diesel models).

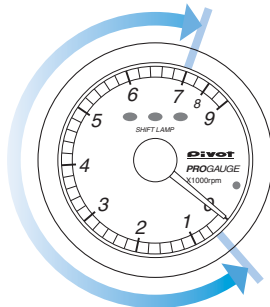

No Wiring Necessary; Simply insert the Connector

Some Toyota and Daihatsu models in which the RPM signal can be detected from the diagnostic monitor connector can be installed simply by connecting the coupler.

Easy-to-read Wide-Scale Display

Magnified display or 500 to 7000 RPM range means improved viewing of low and mid-range RPM used frequently for compact cars and mini-vans.

High Precision Stepping Drive

Stepping motor drive brings you a high-performance display with no hunching or overshooting.

All-in-One Unit; No Separate Controller Necessary

The switches have been added to the meter itself; meaning there are no other parts to be installed.

Easy-to-read translucent LED

The translucent LED system provides a clear even display which is easy on the eyes. (The lamp color may differ slightly from the actual color.)

Super Luminous White LED illumination (PT6-W)

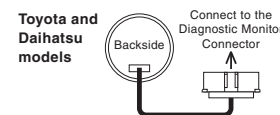

Super Luminous Blue LED illumination (PT6-L)

Can be used in conjunction with other PIVOT Diagnostic Monitor Connected Products

It is possible to use in conjunction with other PIVOT products (X2, X3, RM-07, WTM, and so on) which connect to the Diagnostic Monitor Connector. If you wish to use in conjunction with another company's product which connects to the Diagnostic Monitor Connector, please directly wire.
