

## 3-drive **PRO** THROTTLE CONTROLLER

**No OBD Connection Necessary !**

**Low-Profile Controller provides Genuine-Style Installation**

Our development of low-current circuitry combined with rigorous testing over time have given birth to the 3-drive PRO; it requires no power connection to OBD and can be installed with one simple coupler connection to the accelerator.

## 3-drive PRO THROTTLE CONTROLLER

**No OBD Connection Necessary !**  
**Low-Profile Controller provides Genuine-Style Installation**

### Easy Connection to Accelerator Connector

Simplified wiring prevents signal malfunctions caused by decreased voltage due to low-current circuitry.

### Use with OBD Connected Products OK

With no need for a power connection to the OBD, it is possible to use other OBD connected products without a splitter connection.

### Compact Controller Provides Genuine-Style Installation

The compact, thin, square design with accentuated edge allows for installation in any number of places without that added-on look.

### 17 Step / 4 Mode Wide-Range Adjustment

The four modes include: "POWER" mode with 7 steps for increasing response across all ranges, "RESPONSE" mode with 5 steps for increasing response, like a wire throttle, in the lower and middle ranges, "ECO" mode with 5 steps for suppressing rapid acceleration to help increase gas mileage, and "NORMAL" mode for regular driving.

### Comparison of Acceleration Time

### Comparison of Fuel Consumption

r5: MAX. RESPONSE mode P7: MAX. POWER mode E5: MAX. ECO mode

HONDA STEP WAGON (RG1) / Running distance: 0-400 m / Degree of acceleration: 30%

### High Precision Accelerator Opening Monitor

The highly precise monitoring displays accelerator opening in units of 1% from 5 to 100%.

### Optimized Control for Smooth Ride

Throttle control at all levels has been optimized to provide a silky smooth ride.

### Also Compatible with Collision Mitigation System and Euro Car

This controller can be used in not only euro car, but also, those equipped with collision mitigation systems.

### Set to Prevent Malfunction

The initialization style set-up makes sure that malfunction will never occur no matter what type of pedal is being used.

### Safety System for Extra Peace of Mind

The safety system which automatically returns to "NORMAL" mode upon poor connection or trouble ensures your safety.
