

Clean Sleek Installation keeps the Breeze Blowing!

Designed for Toyota 86 and Subaru BRZ Models

Display Water Temp, Oil Temp and Intake Temp with Easy Coupler Connection.

DUAL GAUGE ANALOG X MULTI DIGITAL **DXW** Series

¥28,000

White Illumination DXW-W

Red Illumination DXW-R

2 Color Choices means a Perfect Match with other Gauges

The DX Series, which operates by simply connecting to the diagnostic monitor connector, adds new models designed exclusively for use with Subaru BRZ and Toyota 86. Two types of holders to choose from: a band holder for dashboard installation and a specialized holder for installation to the air conditioner vent that keeps the breeze coming. Also, match your standard illumination color by selecting from one of two choices.

Display Item	Analog Display	Digital Display
	WATER TEMP	OIL TEMP / INTAKE TEMP (Display switches between types)

Installation Positions

- To the Air Vent: By pulling out the air vent to the right of the steering wheel and replacing it with the supplied holder, it is easy to install the gauge.
- To the Dashboard: Use double-sided tape to affix the supplied band holder to the position that suits you best.

Basic Wiring

Other Specs Same as DX Series. Two-step dimming is only possible with the DXW model.
